

SMART LOCKERS: IT EQUIPMENT & SUPPLIES VENDING

iLockerz intelligent electronic locker systems offer a cutting-edge vending solution for organisations wanting to make a wide range of tech items more accessible to those who need them.

iLockerz offers a 24/7 solution tailored to the needs of organisations seeking to efficiently distribute critical IT equipment to employees. With iLockerz installed, organisations can ensure uninterrupted daily operations while gaining improved control over stock levels.

By implementing iLockerz, organisations can streamline their inventory management process. The smart lockers enable efficient pre-loading and dispensing of necessary items, eliminating disruptions and allowing users to retrieve the equipment they need quickly and conveniently.

With integrated software providing real-time visibility into stock levels, iLockerz automatically issues alerts to designated team members whenever stock is running low, prompting swift action.

iLockerz can be implemented in either a free-to-use or pay-to-use mode, allowing organisations to provide a complimentary service or generate revenue through the vending of items.

Innovative smart lockers for vending of:

- Keyboards
 - Headsets
 - Charging cables
 - Battery packs
 - Hard drives/USB sticks
- ...and more
